1 Precondition:

Please check following before using the digital signage player:

Android Version ： Higher than V4.2 , **V4.42** is better

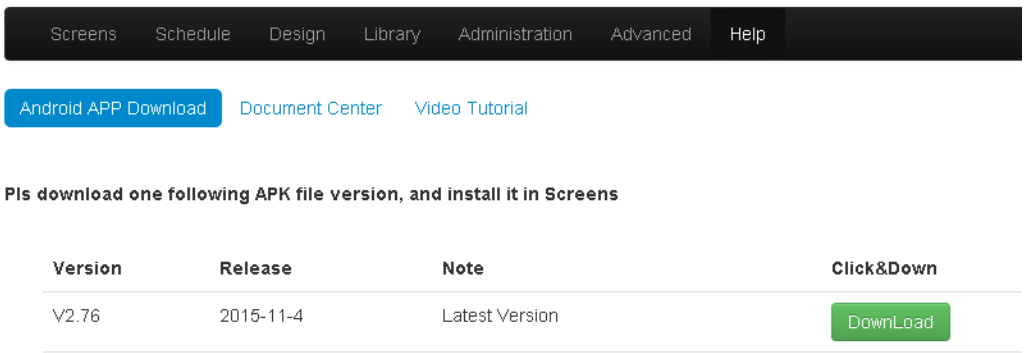
RAM Size : Larger than 500M, **1000M** is better

Can be connected to internet via Wifi, LAN, 3G , etc (*Remark 1)

* Remark 1 ： You may check the internet accessible by opening a NEWS webpage.

2 Get APP Installation File

Login the digital signage server software by the your user name and password (*Remark 2), and download the latest APK on Help/Android APP download submenu ,as following :



*Remark 2: You also can download it from following address directly :

http://47.89.194.83:81/systech/login_apk_down.php

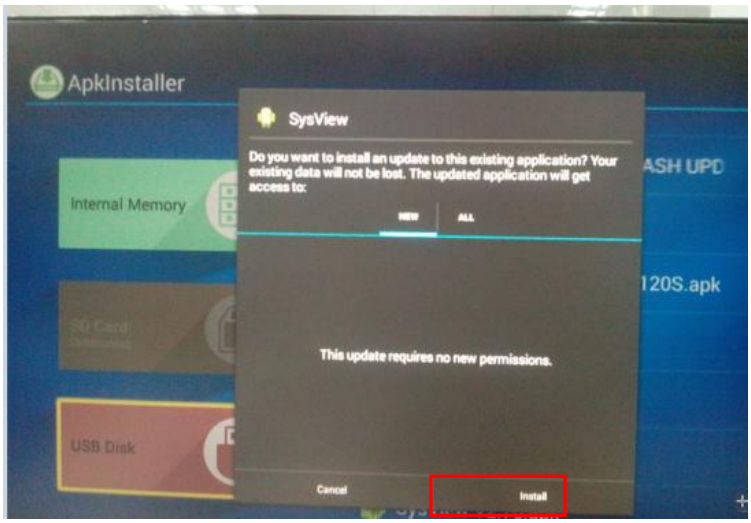
Please contact your contact window in SYS Tech webpage to get your user name and password or contact sales@sysembed.com to get free demo account.

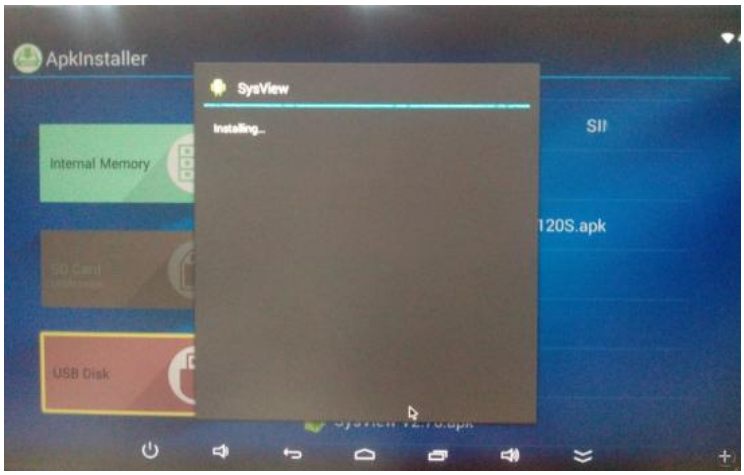
3 Copy File into USB disk

Please copy the APK File to USB disk and plug the usb disk in the digital signage player.

4 Install

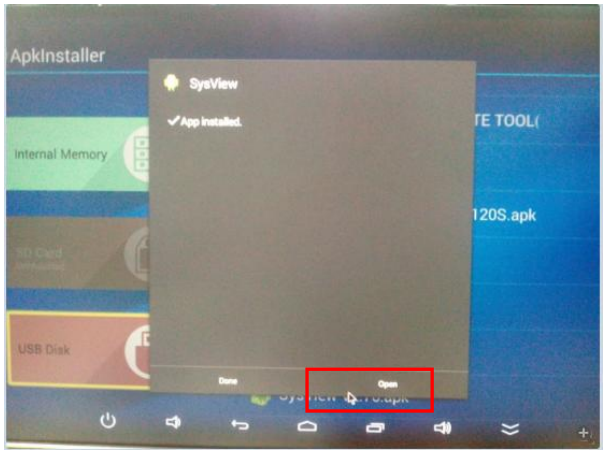
Find the APK File in USB disk , double click the APK to install .





5 Run Android Player Tool

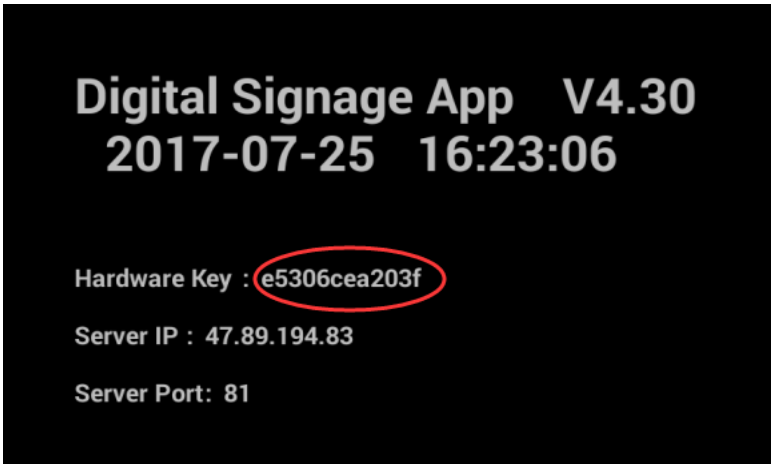
Once installation finished, click open to run the digital signage APK.



If you run SysView for the first time, system will pop-up <SysView Report Tool> installation windows, pls click <Install> or <OK> to continue to install <SysView Report Tool>

6 Record hardware key

After running , black screen displays as no channels scheduled to the screen, only time/date/version display, and hardware key and some setting as following:



Pls find <hardware key> on screen, and record it on paper, because it is important to next step.

7 Find your device online at Web Management

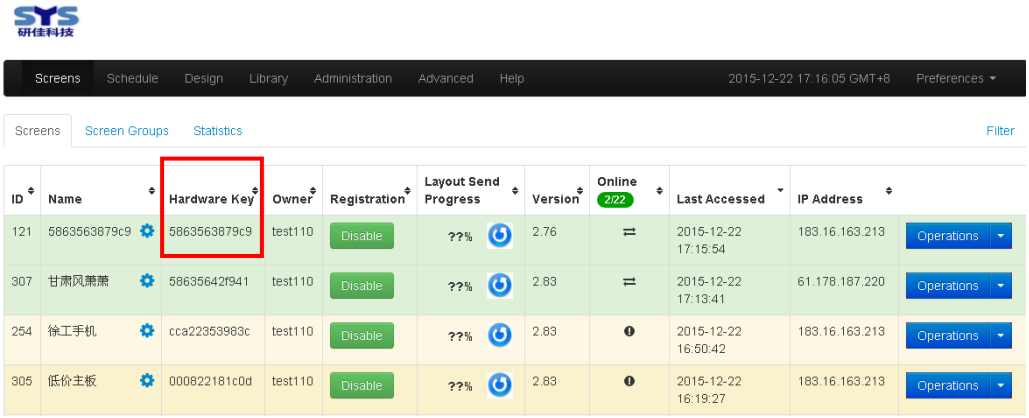
After record the hardware key , pls keep the SysView APP running .

Then, login our Management Webpage (*Remark 3)

http://47.89.194.83:81/systech/

And click the <Screens/Screens> submenu. Find the device in hardware key volume with same key number which you record on step6 .

And SAME key is your device ：

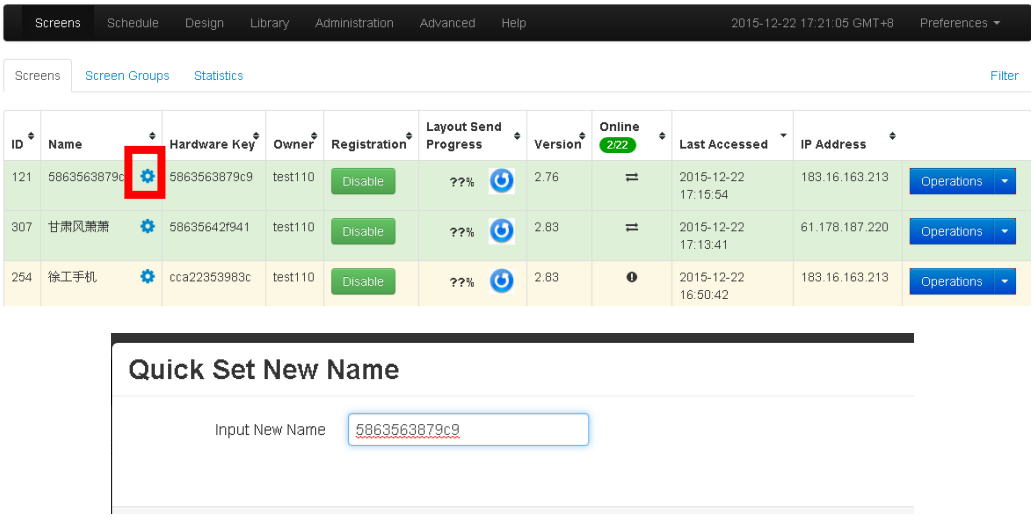


*remark 3:

To get detail for Management Web Operation , pls read another document <SystemView2000 Web Manage Quick Start V3.1.pdf>

8 Rename your device

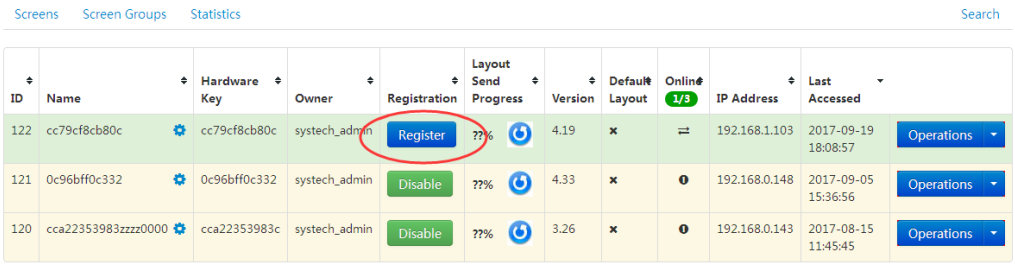
The default device name is same as hardware key. Click the Gear-Button beside device name, you may rename the device . The device name compatible to multi language including English, Chinese, Russian, French, Spanish, etc.



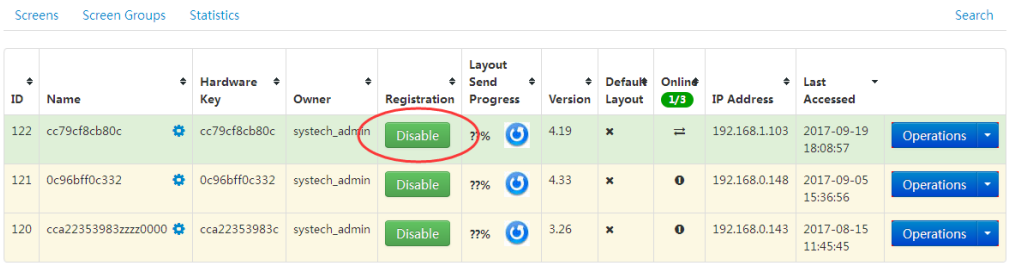
9 Register your device on Web Management

You need register your device at first , else system will stop device function.

Click <Register> Blue-Button in <Registration> column to register your device.



If your registration is successful, the button change to Green-Button <Disable>, as following :



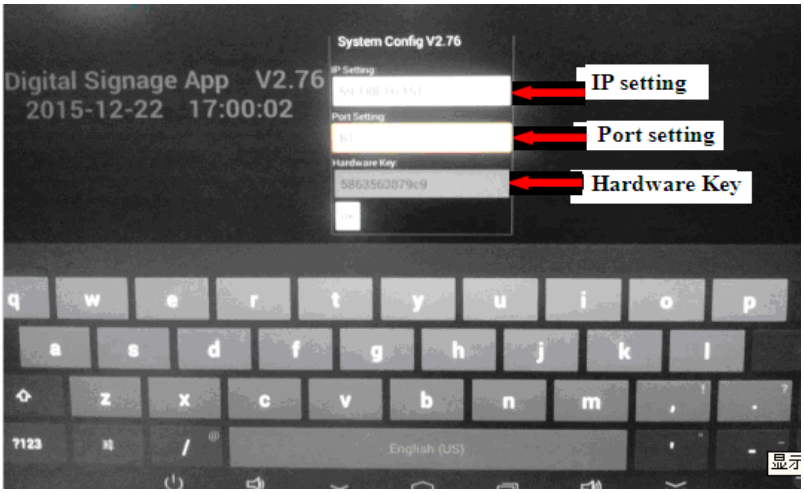
Then you can design playlist and schedule the playlist with display script to the digital signage player. For more about how to design playlist and schedule, please refer to the document :

<SystemView2000 Web Manage Quick Start.pdf>

10 How to change server IP & Port setting

Pls keep default setting unless you already own your server.

If you click screen by the mouse or by your finger, the screen will be pop-up one configuration windows: (*remark 4)



You can edit these setting, and you also can find <hardware key>,

Click Button <SAVE> to save the new configuration or Click screen to close configuration windows.

If you test our app for the first time, pls click screen to close configuration windows and keep all default.

If setting something be wrong, it will cause your testing be FAIL.

Finally, You can click screen again to close configuration windows.

*remark 4 :

If you click on the webpage , text, or other interactive interface, the configuration windows NOT be showed. Then, you can try to click another place on screen .
